Hi Jane,

Can you find out if carbaryl is important to WA and/or OR growers? It is not used much in CA for these uses. I don't know why I didn't ask you earlier!

Al - Any information from AZ?

Thanks.

Rick

Subject: Fw: EPA Request for Floriculture Information

Rick - Don Atwood is out for a few days, so I'm following up for him.

Thanks for the information you sent on carbaryl use in floriculture. I believe you sent Calif. data concerning this request. We're aware of these data and have already considered it. I wonder if it's possible to get information concerning carbaryl use in other parts of the West, e.g., WA, OR, and any other state(s) that might use it? I understand this information is difficult to come by, but anything you can dig up would be appreciated. If you have any suggestions for who we might contact, we'd appreciate the suggestion and we can follow up on our own.

I hope you and your family have a great Memorial Day weekend.

Thanks and regards,

RE: EPA Request for Information

Dear Al and Don,

Attached is my reply to your information request on carbaryl use in floriculture. We do not use much in California.

Rick

Subject: EPA Request for Information

Colleagues,

Attached is a request from EPA for information on the use of carbaryl in floriculture.

I know this is a very busy season for most of you and appreciate whatever you can do to provide the requested information.

If you have any follow-up questions, please direct them to Don Atwood at EPA.

Regards,

Al
